

SwiftCiti App Requirements

Project scope

The goal of the swift city platform is to provide users with unique items in a stress free manner. These items can be in the form of food or personal items that are normally delivered via a delivery driver.

User Stories

Customer – As a customer, I want to be able to order food , groceries or send personal items from the convenience of my home so that I can spend time on other important items.

Driver- As a driver , I want to be able to deliver goods and services with ease on my own time , so that I can earn income on my own time.

Merchant – As a merchant, I want to sell goods and update items as needed, so that my unique goods can get in the hands of my customers easily
